AATOM INDIA

Revolutionizing Space With Intelligent
Parking Solutions

Automation That Elevates Urban Living

WHO ARE WE?

We think that space is more than just ground; it is an opportunity. Opportunity for cities to breathe, businesses to expand, and individuals to live with greater comfort and ease. That is why we design clever multi-level parking solutions that help realize the full potential of every square foot.

AATOM INDIA, wholly owned by **Rishikesh Structural Solutions Ltd.**, carries forward a legacy of engineering strength and trusted manufacturing excellence. With over two decades of engineering experience, our team combines smart design, innovative technology, and dependable production to create parking solutions that make urban spaces more functional, accessible, and future-ready.

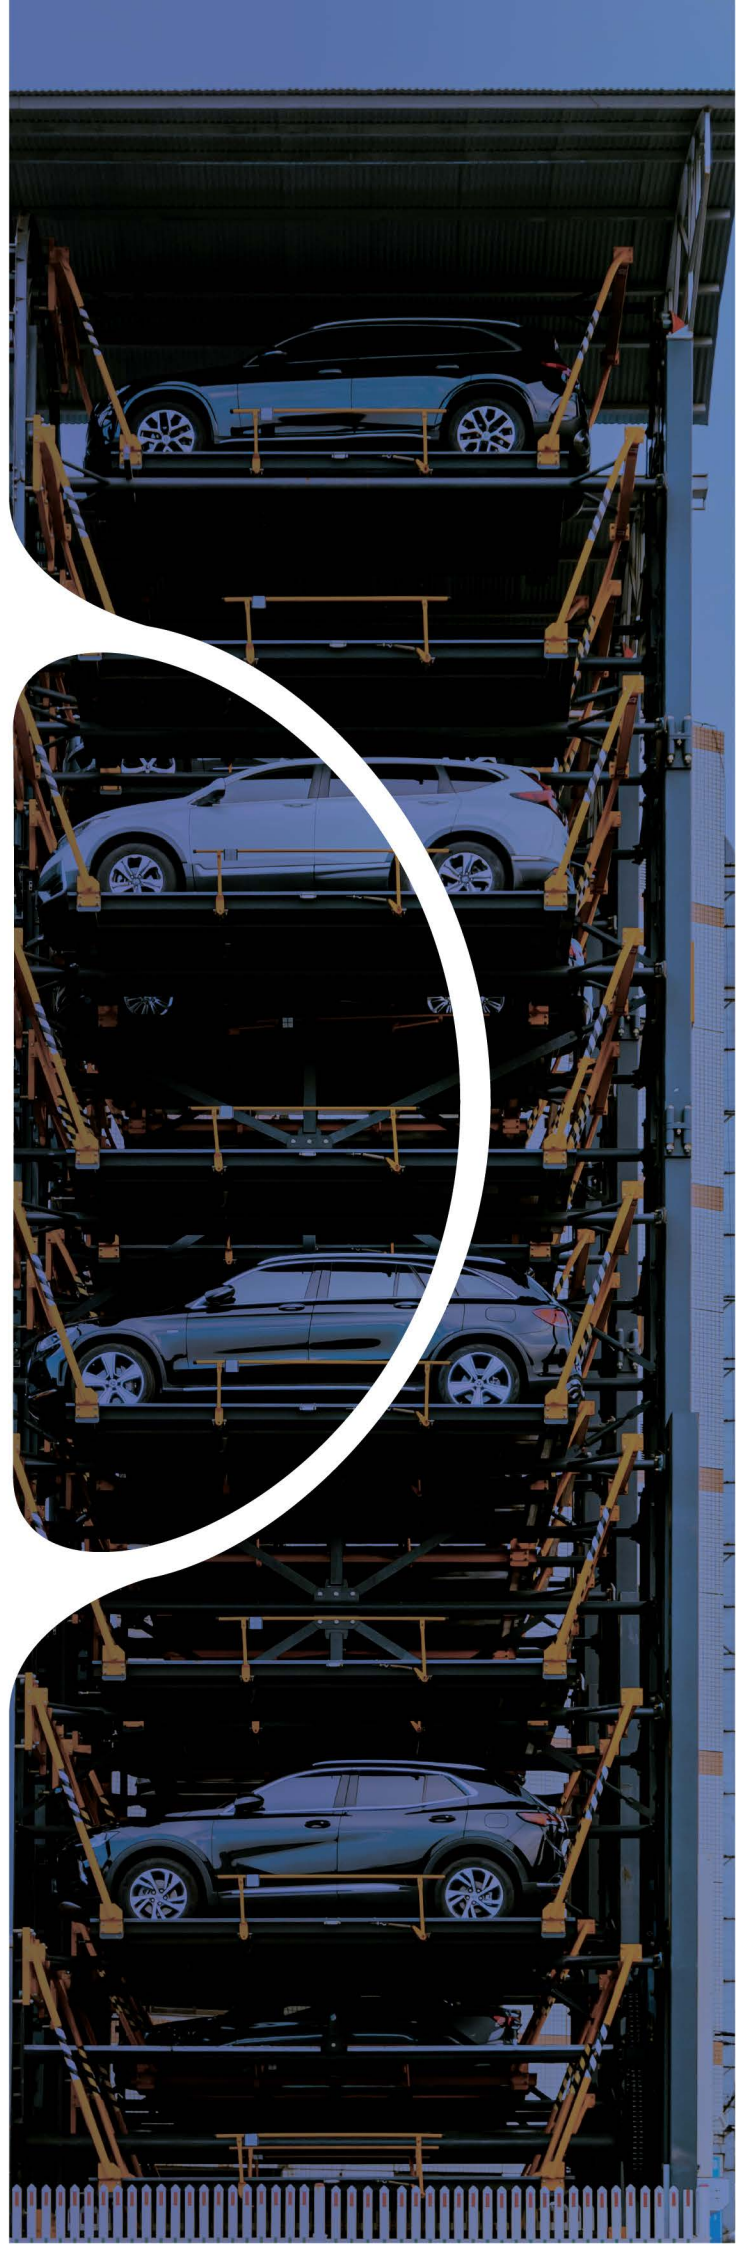

Our goal is to make parking simple, efficient, and adaptable to modern lifestyles.

WHY US?

AATOM INDIA represents peace of mind. With decades of engineering experience and a thorough understanding of how people use urban areas, we design parking systems that are not only functional but meaningful. Our solutions free up space, reduce everyday stress, and enable societies, builders, and enterprises to provide smoother, safer, and more intelligent parking experiences. With certified quality, a dedicated team, and end-to-end service, we ensure that every project runs smoothly from start to finish.

Our Commitment to Quality

1. Uncompromised Material Standards
2. Highly Skilled & Professionally Trained Design & Engineering Team
3. ISO- 9001:2015 certified company
4. Rigorous Testing & Inspection

01 Tower Parking System

Our Tower Parking System is engineered to deliver maximum capacity using minimal land. Built for modern societies and commercial spaces, this fully automated solution combines vertical lift technology with intelligent pallet movement to ensure safe, fast, and effortless parking. Designed as an independent tower structure, it is ideal for high-density areas where space is limited but reliability and efficiency are essential.

Capacity:
20–60 cars

Safety:
No-entry zone, automated rotation

Operation:
Vertical lift + pallet shifting

Recommended For:
Residential, Commercial Corporate Offices, Government/Corporations, Hospitality

Puzzle Parking System

02

Capacity:
5–23 cars

Safety:
Safe and Independent system

Operation:
Hydraulic vertical and Horizontal Movement

Recommended For:
Residential, Commercial Corporate Offices, Government/Corporations, Hospitality

The Puzzle Parking System is a smart, space-optimised solution that arranges cars through a combination of vertical lifting and horizontal shifting. Designed for spaces with high parking demand, it offers quick access, smooth automated movement, and flexible configurations to match different site layouts. With strong safety controls and efficient space utilisation, it's an ideal choice for residential buildings, commercial complexes, and mixed-use developments looking to maximise capacity without expanding their footprint.

03 Stack Parking System

The Hydraulic Stack Parking System is a simple, efficient way to instantly increase parking capacity by using vertical space. With a smooth hydraulic lift that safely parks one car above another, it offers a practical and cost-effective solution for residential societies, offices, and commercial buildings. Easy to operate and low on maintenance, it maximises space without requiring major construction or layout changes, making it a smart choice for compact properties.

Capacity:
2 Cars each unit

Safety:
Certified lifting capacity

Operation:
Pallet-based verticle movement system

Recommended For:
Residential, Commercial Corporate Offices, Government/Corporations, Hospitality

04 Shuttle Parking System

The Shuttle Parking System is a fully automated, high-capacity solution designed for wide floor plates and projects requiring rapid vehicle movement. Using coordinated horizontal shuttles and vertical lifts, the system transports cars smoothly across multiple rows and levels without ramps or manual driving. Its modular layout adapts easily to large residential, commercial, or mixed-use developments, offering fast retrieval times, efficient traffic flow, and exceptional parking density within the available footprint.

Capacity:

High-density layouts with multi-row, multi-level configurations

Safety:

No human entry, sensor-controlled movement, automated positioning

Operation:

Horizontal shuttle carriers + vertical lifts working simultaneously

Recommended For:

Large residential towers, commercial complexes, mixed-use developments, wide-layout basements

Capacity:

8 / 10 / 12 / 14 Cars

Safety:

Sensor-based movement, controlled rotation, protected motor housing

Operation:

Single-motor rotary mechanism + chain-driven O-loop system

Recommended For:

Tight urban plots, showrooms, small societies, commercial entrances, retrofit installations

Rotary Parking System

The Rotary Parking System is a compact automated solution designed for locations with extremely limited ground space. Vehicles are rotated vertically using a single-motor mechanism, allowing multiple cars to be parked within the footprint of just two conventional parking spaces. Its modular structure supports indoor or outdoor installation, offers flexible entry/exit arrangements, and enables back-to-back placement to increase total capacity, making it ideal for dense urban environments where efficient space utilisation is essential.

05

MAINTENANCE & SUPPORT

At AATOM INDIA, we believe a great parking system doesn't end at installation it begins there. Regular preventive maintenance ensures smooth operation, long-term safety, and reliable performance every day. Our trained engineers provide expert servicing to keep your system running in optimal condition, reduce downtime, and extend its lifespan. With quick response times, genuine spare parts, and dedicated after-sales support, we make sure your parking system stays dependable, efficient, and ready for everyday use.

You Can Count on Us...

- **Expert Knowledge**
Our technicians understand AATOM parking systems inside out and deliver precise, reliable upkeep.
- **Scheduled Preventive Maintenance**
Regular site visits ensure early detection of issues, smoother performance, and extended system life.
- **On-Site Training Assistance**
We guide your staff on safe and efficient day-to-day operation so your system runs seamlessly.
- **Genuine Spare Parts Availability**
Quick access to original components ensures fast repairs and minimal downtime.
- **24/7 Service Support**
Round-the-clock assistance for urgent issues so your parking remains uninterrupted.
- **Enhanced Safety Checks**
Routine inspections covering sensors, locks, controls, and movement systems ensure complete user safety.
- **Expertise in Third-Party Maintenance**
Our experienced team is skilled in maintaining all well-known parking system brands, ensuring seamless service across third-party installations as well.
- **Customer-Centric Approach**
We focus on quick responses, transparent communication, and dependable after-sales service.

FACTORY & PRODUCTION

- ₹200 Cr+ Annual Group Turnover
- 2 Manufacturing Hubs
- 4,00,000 sq. ft. Production Capacity
- 3 Marketing Offices
- 10+ Marketing Professionals
- 20+ Installation & Commissioning Experts
- 500+ Employees
- PAN-India Presence

Certifications...

ISO 9001: 2015 (QMS)

ISO 14001: 2015 (EMS)

ISO 45001: 2018 (OHSAS)

OUR CORE VALUES

1

PASSION

At AATOM INDIA, passion is our fuel. It sparks momentum, pushes us to elevate the bar, and drives us to turn bold ideas into business impact. We channel that energy into meaningful work, cultivating creativity and clearing roadblocks so innovation doesn't just happen, it thrives.

2

INTERGRITY

Integrity is our operating system. We lead with transparency, fairness, and unwavering respect, the kind that strengthens relationships, builds trust, and sets the tone for accountable collaboration. When we say we'll deliver, we mean it. No fine print. No shortcuts.

3

INNOVATION

Innovation is baked into our DNA. We challenge assumptions, embrace smart risk-taking, and stay curious so we can engineer solutions that move the needle. Every idea, no matter how small, becomes an opportunity for continuous improvement and future-ready growth.

4

UNITY

Unity is our competitive advantage. We bring together diverse perspectives and distinct strengths to create collective momentum that's impossible to stop. When our people collaborate, barriers break, creativity expands, and the whole becomes far greater than the sum of its parts.
